# LAPS

---

**Analysis and nowcasting system  
for localized areas**

***Finnish Meteorological Institute  
Erik Gregow***

10.9.2008

## **Overview of presentation:**

- Status report of the workpackages (WP)
  - WP1: Adoption of input data
  - WP2: Interface to data archive
  - WP3: Configuration for HTB area
  - WP4: Visualization of LAPS output
  - WP5: Evaluation of LAPS
  - WP6: Portability
- Planned future developments of LAPS
- Examples of visualization

## WP1- Adoption of input data

Deliverables in June 2008

ILMATIETEEN LAITOS  
METEOROLOGISKA INSTITUTET  
FINNISH METEOROLOGICAL INSTITUTE

## **WP2 – Interface to data archive**

**Deliverables in October 2008**

- LAPS products are available every hour in following formats;
  - NetCDF (Full dataset)
  - GRIB1 (Not full dataset)
  - GRIB2 (Not full dataset)
- Data are accessible via;
  - HTB-webpage (/WORK\_AREA/archive)
  - RTD (Real Time Database)
  - Within FMI computer facilities

METEOROLOGISKA INSTITUTET  
FINNISH METEOROLOGICAL INSTITUTE

## **WP3 – Configuration for HTB area**

**Deliverables in October 2008**

- Southern Finland (HTB) domain:  
Resolution 1 km in horizontal  
41 Vertical levels (every 25 hPa)  
Gridpoints: 400 \* 300
- Finland domain:  
Resolution 3 km in horizontal  
41 vertical levels (every 25 hPa)  
Gridpoints: 200 \* 400
- Runs operationally every hour at FMI super computer system:  
Jumbo/Sambo/Mortti/Vertti

## WP4 – Visualization of LAPS output

Deliverables in October 2008

- **Interactive webpages:**

HTB domain: <http://laps.fmi.fi/cgi-bin/nph-laps.cgi>

Finland: <http://dev.laps.fmi.fi/cgi-bin/nph-laps.cgi>

- **Animations at webpages:**

Helsinki Testbed domain:

[http://laps.fmi.fi/history\\_browser-laps.php](http://laps.fmi.fi/history_browser-laps.php)

Finland domain:

[http://laps.fmi.fi/history\\_browser-laps-Finland.php](http://laps.fmi.fi/history_browser-laps-Finland.php)

HTB-homepage: <http://testbed.fmi.fi/>

- **SMARTMET at FMI**

— LAPS: Helsinki Testbed domain, 1 km res.

— LAPS: Finland domain, 3 km res.

## **WP5 – Evaluation of LAPS**

## **Deliverables in December 2008**

- Planned evaluation/verification by forecasters (Weather duty-, Aviation- and Commercial- forecasters) during autumn 2008.

The aim of this survey is to answer the following questions:

- What is the quality of LAPS output (stability, availability etc.)
  - How well does LAPS perform (compared with observations, other analysis like MESAN and forecast models like AROME, HIRLAM)
  - Is LAPS useful as now-casting tool
  - Does LAPS capture small scale phenomenas (fog, sea-breeze etc.)
  - Does LAPS bring any added value for the forecasters
- Planned verification within SISU-verification tool

## **WP6 – Portability:**

## **Deliverables in December 2008**

- FMI has technical and practical experience on how to port the LAPS system to a some computer facilities.
- Portability is technically challenging due to different format of input data (satellite, radar, observations etc.)
- This task was mainly stipulated for Vaisala within UbiCasting project.

## **LAPS – Planned future developments**

- New background fields from HIRLAM
- Adopt AROME as forecast model ("hot-start", forecasts 1-6 hours ahead)
- New satellite ingest: Meteosat 9
- More observations as input; Profilers, Road-Weather stations etc.
- LAPS products available via Mapserver, better for end-users specific needs
- LAPS as background fields to Air-Quality models (other models...)
- Collaboration between other European LAPS-users on common topics
